Event Report

Info Session

Featuring

PE Ankit Shukla

Organized By:

Department of Mechanical Engineering

Student's Chapter The Institute of Engineers India

and

Aerospace Club, MITS-DU Gwalior

Event Date: 24th OCT 2025

1. Event Overview

The Aerospace Club, in collaboration with the Institution of Engineers (India), Gwalior Local Centre, hosted a **hybrid Info Session on Aeronautics** on **24 October 2025**. The session aimed to introduce students to real-world aeronautics, industry growth trends, and emerging career opportunities.

The keynote speaker, **PE Ankit Shukla** (Advanced Lead Engineer, GE Aeronautics), delivered a focused and practical overview of modern aviation systems. He highlighted how the global aviation sector is expanding and how precision engineering, efficient operations, and advanced technology drive the industry.

Key Highlights:

- Insight into airline operations: aircraft selection, scheduling, turnaround, and runway management.
- Behind-the-scenes look at manufacturing accuracy—down to **1/10th the thickness of a human hair** in engine and aircraft components.
- Understanding global aerospace supply chains, multi-sourcing, and international collaborations.
- Importance of **MRO (Maintenance, Repair, and Overhaul)** facilities in ensuring safety and performance.
- Explanation of runway categories (CAT I–III), fog operations, fuel planning, and air-traffic decision-making.
- Emphasis on sustainability, material engineering, and the complexity behind modern aerospace systems.

Overall, the session helped students connect classroom learning with industry practices, offering clear direction and motivation for pursuing careers in aeronautics.

2.Key Takeaways from Info Session

- Expanding aviation industry creating employment opportunities, boosting tourism, connectivity, and delivery networks.
- Insight into how airlines operate — from aircraft selection, scheduling, and ground handling to turnaround and runway management.
- Overview of aircraft and engine manufacturing, highlighting extreme precision (1/10th of hair thickness) and advanced machinery use.
- Discussion on global collaborations, strategic partnerships, and multi-sourcing in manufacturing and supply chains.
- Importance of MRO (Maintenance, Repair, and Overhaul) facilities for safety, performance, and timely servicing.
- Explanation of runway types (CAT I–III), their significance, and conditions like dense fog operations for international flights.
- Challenges in fuel calculation, pollution control, and the role of instant decision-making in air traffic management.
- Emphasis on material engineering, manufacturing complexity, and sustainability in modern aerospace systems.
- **Conclusion:**
Strong fundamentals and continuous innovation are key to advancing the future of aviation and aeronautics.

3. Summary

- The Info Session effectively gave students a real-world understanding of how the aeronautics industry functions.
- It bridged academic knowledge with practical insights, helping students see the relevance of their studies.
- The expert talk by PE Ankit Shukla clarified industry expectations, career pathways, and required skill sets.
- Students gained awareness of the precision, safety processes, and global coordination involved in modern aviation.
- The event inspired participants to explore opportunities in aeronautics with greater confidence and curiosity.

4. Glimpses of Event

कार्यक्रम का संचालन एयरोस्पेस क्लब द्वारा किया गया और सम्बन्धित इंस्टिट्यूट और इंजीनियर्स (इंडिया) के सहयोग से हुआ। कार्यक्रम में इंजीनियर राधाकृष्णन खेत्या प्रोफेशनल इंजीनियर विनय शुक्ला, डॉ. विनय शुक्ला, इंजी शिव कपूर, डॉ. एम स्टीवेंट सेलफेयर डॉ. मणीश काणार सागर, प्राप्रि अधिवासीक विभागाध्यक्ष डॉ. सी. ए. मालवी एवं डॉ. नितिन उन्नाध्याय उपस्थित थे।
