REPORT ON GALACTIC PI-RATES EVENT

29th March 2025

**ORGANIZED BY:
AEROSPACE CLUB
MITS GWALIOR**

**FACULTY CO-ORDINATOR:
DR. NITIN UPADHYAY**

INTRODUCTION

On March 29, 2025, Aerospace Club of MITS-DU GWALIOR organised an event titled "GALACTIC PI-RATES," celebrating Pi Day. The primary objective of the event was to celebrate the fascinating intersection between mathematics and space exploration, highlighting the significance of Pi (π) in both fields.

Pi Day is traditionally celebrated on March 14th (3/14) due to the mathematical constant's first three digits (3.14). The day not only marked the celebration of Pi but also the birth of Albert Einstein, whose work in theoretical physics continues to influence modern science, and the legacy of Stephen Hawking, known for his groundbreaking contributions to the study of black holes and the universe.

- Prizes For Winners &
- Hardcopy Certificate For All

EVENT OVERVIEW

Galactic Pi-Rates was designed to combine the excitement of mathematics and space exploration.

The event featured two engaging rounds that tested participants' logical thinking, problem-solving abilities, and knowledge related to space and mathematics.

Round 1: Alien Coded Puzzle Solving

- Participants were divided into group of 3
- Each group had 3 minutes and 14 seconds to decode as many alien-coded puzzles as possible.
- The top performing groups qualified for the next round based on their speed and accuracy.

EVENT OVERVIEW

Round 2: Find the Path Challenge

- Selected participants competed individually and were presented with a series of clues and questions related to space.
- Each clue was designed to point towards a hidden space-related path, and participants had to analyze the clues to identify the correct path
- The participant who correctly guessed the path in the least time and using the minimum hints was declared the winner.
- The top three participants were announced as winners of the event.

A total of 90 students participated and received hardcopy certificates as a token of appreciation.

CONCLUSION

The "Galactic Pi-Rates" event was a successful blend of space exploration and problem-solving, offering participants an exciting opportunity to enhance their critical thinking and teamwork skills. Through two challenging rounds, participants not only tested their ability to solve complex puzzles but also developed a greater understanding of space-related concepts. The event effectively sparked curiosity and encouraged participants to engage with science and mathematics in a fun and interactive way. The Aerospace Club extends its heartfelt thanks to all participants, volunteers, and faculty members who contributed to making this event a success.
